

SWINGING FIRE HOSE REEL FOR WALL/CABINET MOUNTING

GENERAL

Hose reel equipped with an automatic stop/manual valve, mounted on a swinging arm with internal waterways which swings 180° so that the hose can be run out in all directions. The hose reel is supplied with a mounting template, which simplifies the installation. The automatic stop valve opens to provide full capacity within just two revolutions of the reel. The hose reel is suitable for use in office buildings, schools, hotels and conference centres, hospitals, sports arenas, cinemas, airports and shopping Centres.

FEATURES

- Hose reel with side discs powder coated RAL3000 red
- Integrated automatic stop/manual valve
- Jet/spray/shut-off nozzle
- Red hose approved to BS EN 694 for fire hose reels
- Mounting template
- Swinging arm with internal waterways, hinged on right hand side
- Optional swing arm without internal waterway available, supplied with inlet hose pipe.
